Environmental/Natural Resources/Fisheries Priorities

Read over the list of 20 Environmental/Natural Resources/Fisheries Projects that have been proposed by the community throughout the planning process. Many are services that are currently being offered, but that the community felt needed to be expanded or improved. Think very carefully about what each of these projects might mean to the community in terms of making the Burns Paiute Reservation a better place to live and raise a family. Then, place the numbers 1-20 on the lines in front of the projects to prioritize them. #1 should be the project or program you feel is most important and that should be done before any other. #24 should be the project or program you feel is least important and that can be addressed last.
